The Understanding America Study

- Since 2014, longitudinal, national probability-based panel of approximately 8,500 US residents, collecting information at multiple time points each year on economic, labor, attitudinal, and health measures, etc.
- Tracking pandemic effects starting March 10, 2020
- Every day ~500 respondents answer UAS questions, 7000 over a two-week period
We Conduct Surveys Online, and Provide Internet-Connected Tablets...

...to people who didn’t have Internet access before, permitting participation among older, lower income, lower education, rural, unemployed, and/or disabled participants, making the UAS truly representative of the US population.
**~1,450 UAS Households With Minimum One K-12 Child**

Q: Schools are considering several policies in the wake of recent school closures. Do you oppose or support each of the following policies?
But More Parents of Color Wanted Remote Learning
By October 2020, some parents reported improvements over the spring, though with a long way to go.
Overall Parents’ Grades for School Quality Improved, But Not So Much Among Remote

Parents' Grades for School's Overall Quality of Education

- Pre-COVID
- Spring
- Fall

Grade (GPA scale: A=4, F=0)

In-person in fall: Blue line
Remote in fall: Red line
Hybrid in fall: Green line
Same Pattern for Science Instruction Quality Grades

Parents' Grades for School's Science Instruction Quality

Grade (GPA scale: A=4, F=0)

Pre-COVID
Spring
Fall

In-person in fall
Remote in fall
Hybrid in fall
...And for Math

Parents' Grades for School's Math Instruction Quality

Grade (GPA scale: A=4, F=0)

Pre-COVID          Spring          Fall

In-person in fall  Remote in fall  Hybrid in fall
Schools Were Delivering More Services in October Than in April, But Not at Pre-COVID-19 Levels
Parents Support Cancelling Spring 2021 Standardized Tests

US Parents Show Relatively High, Uniform Support for Cancelling Standardized Tests in Spring 2021

Data from October 2020 administration of the UAS
November 2020 through June 2021 we have been collecting data on child attendance mode, parent preferences, school mitigation strategies.
White Parents Increasingly Preferred In-Person Learning

Parent preference for how child attends school

Race-ethnicity = White – National sample; 7-day window; s race-ethnicity; probs1062a_note

USC Dornsife
Center for Economic and Social Research

University of Southern California
Black Parents Were Much More Ambivalent About In-Person
Hispanic Parents Have Been Less Enthusiastic About In-Person
April-May 2021 we collected data about “school hesitancy,” and parents’ perspectives on policy interventions
Parents Have Multiple Reasons for Not Sending Their Children Back In-Person—But Mostly Safety and “Child Fit”

K-12 parents’ reasons for not sending their child to in-person schooling in April-May of 2021

- In-person not substantially different from online: 4%
- School safety protocols uncomfortable for child: 6%
- Adults at school not vaccinated: 7%
- Only option was hybrid: 8%
- Logistics/scheduling complications: 9%
- Remote allows greater family involvement: 10%
- No in person option: 10%
- Other reason: 10%
- Existing safety measures insufficient: 13%
- Family likes remote learning schedule better: 20%
- Child is same/happier: 22%
- Child is doing same/better academically: 25%
- Do not trust school to keep child safe: 28%
- Child wants to stay remote: 30%
- Safer for child/family: 45%

Ongoing Work

• Continuing to track children’s attendance mode, options their schools are offering, and school in-person safety precautions

• New surveys in June, October 2021

• Linking education data to the full UAS dataset and COVID case, hospitalization, death, vaccine rates

• Continuing to publish results in education and mainstream press, prepare papers for peer-reviewed publication

• Stay tuned!

Summary of Results

uasdata.usc.edu/education

- Remote learner needs have included one computer per child, acceptable internet service, meals and mental health support—as well as tutoring, parent homework support, child care.
- Remote learning attendance varied considerably nationwide through the year, as did parent views on education quality.
- Wide variation by race and household income in parents’ attendance mode preferences for their children—concerns of ongoing “school hesitancy”.
- Parents have multiple reasons for keeping their children out of in-person school, but most come down to “safety” and “fit” reasons.
- Parent interest in many “popular” policies is limited.
- Bipartisan support for civic education topics.
Greater Proportions of Remote Parents Report Their Child is Unprepared in Science

Parents Reporting their Child is Academically Unprepared in Science, by Fall Attendance Mode

- In person in fall
- Remote in fall
- Hybrid in fall
Greater Proportions of Remote Parents Report Their Child is Unprepared in Math

Parents Reporting their Child is Academically Unprepared in Math, by Fall Attendance Mode

In person in fall
Remote in fall
Hybrid in fall

USC Dornsife Center for Economic and Social Research
Greater Proportions of Remote Parents Report Their Child is Unprepared in ELA as well

Parents Reporting their Child is Academically Unprepared in ELA, by Fall Attendance Mode
Remote Learners Need Tutoring, More Supports for Parents, More Computers, Better Internet

- Nearly 40 percent of parents reporting their children need tutoring say their schools did not provide it
- Roughly half of parents with a high school degree (or less) feel equipped to help their own children with homework, math 51%, science 58%
- While computer/device provision has improved, 3.5% of remote learners do not have a device for learning—nearly one in ten share
- While just over one percent of families do not have internet access, 22% report continuous internet interruptions, 40% for lowest income (<$25K)
- More than one in ten families with remote learners have formed “pods” where students learn together in-person with the help of a tutor or teacher, 15% among families with household income less than $50K
Almost Everyone is Concerned about K-12 Students’ Academic Progress

Public concern about academic progress of low-income K-12 children

Note: Data collected between Dec. 16-Feb. 7 from a nationally representative sample of U.S. adults.
Results and Policy Implications

• Remote learning attendance differs nationwide
  – Remote learning is inferior so we know which groups of students are most in need
• Remote learner needs include tutoring, parent homework support, one computer per child, acceptable internet service, child care
  – We know some areas to bolster supports
• Special service provision is not back to pre-COVID levels including for meals and mental health support
  – We know some more areas to bolster supports
• Parents’ support for mask-wearing in schools increased since summer
  – Physically opening schools is complicated but increased parent support for mask-wearing is promising
• Parents’ support for cancelling standardized tests increased since spring
  – Standardized testing will need to be targeted, with attention paid to messaging for parents
• In spring 2021, white and higher-income parents want to send children back to school in person, while families of color and lower-income families have been more cautious
  – Sharing these trends is critical to informing national reopening dialogues
